26x10-12 VOLTYRE-CROSSTOUR MO-21

ATV tires with increased flotation under severe off-road conditions (mud, sand, clay, snow). They run in climatic zones at ambient temperature from minus 20 to plus 60 °C. On harder surfaces this type of rubber has excellent characteristics and does not discomfort while operating the machine. The carcass of the construction is light and at the same time reliable because of the use of modern technologies and high-strength materials in production. The special rubber compound is resistant to any attack but still elastic enough to let the tire run softly.

Tire parameters:

Brand	VOLTYRE
Overall diameter, mm	660
Profile width	274
Rim diameter, inh	12
Load index	52J
Maximum load, kgf	200
Pressure, kPa	69
Maximum speed, km/h	100
Rim	7,5J-12
Model	MO-21
Tread depth, mm	25
Standard size, inh	26x10-12

All the claims shall be mailed to:

404103, Volzhsky, 7 Avtodoroga, 25A, JSC Voltyre-Prom, or reported by phone +7(8443) 24-02-95
